Welcome to our first collection of English Roses for Australia. We are proud to be a family owned company with a long heritage of breeding and growing roses. Our objective has always remained the same: to combine the best of the old with the best of the new, to create roses that will provide the greatest possible pleasure for the gardener.

Today’s English Roses provide a succession of beautiful fragrant blooms in a wide range of natural, pure colours. They have graceful, natural, shrubby growth which makes them ideal for large pots, beds and mixed borders. Our English Roses are particularly well suited to the Australian climate. They have performed wonderfully well even throughout times of drought and heavy rain. In recent years we have made some great improvements to the health and vigour of the roses. As a result, we believe the new varieties for 2011 and 2012 are some of the best we have ever introduced.

Three of our new varieties have already received several important accolades from around the world. ‘Princess Alexandra of Kent’ won the top award for fragrance at both the 2009 Glasgow Trials and the 2010 Desert Rose Society show in California. It has a delicious fresh tea scent, which changes to lemon over time with a hint of blackcurrants. At the 2009 Concurs Internacional de Roses in Barcelona ‘Young Lycidas’ with its intriguing mixed scent of tea, old rose and cedar was also awarded the top prize for fragrance and Wisley 2008 was presented with Best Rose for Landscaping.

If you are finding it hard to choose the best rose for your needs from the many varieties available, you might like to consult pages 52 and 53, where we suggest the perfect varieties for different situations such as ideal roses for hedging; excellent shrubs and climbers for growing in shady positions and the best roses for cutting and creating arrangements for the home.

We would like to wish all rose lovers a very happy gardening year.

ABOUT DAVID AUSTIN ROSES

David Austin Roses is an internationally recognised, family-owned business which takes a long-term approach to breeding and marketing our award-winning roses. The first David Austin roses to hit Australia were widely acclaimed and still have great recognition amongst many Australian gardeners.

The company maintains a consistently high level of investment in breeding and trialling new varieties. As a result, roses released during the last ten to fifteen years have greatly improved health and disease-resistance. The release of many compact new English Roses has broadened the appeal of the collection.

The English Roses are not like other roses. They quickly form magnificent, fragrant shrubs and climbers which make great impact in the garden. Their large, fragrant blooms have an old world charm and allure that attracts a passionate following. David Austin’s roses can be found in prestigious private and public gardens throughout Australia.

The company has won many awards, including fifteen gold medals from The Royal Horticultural Society’s Chelsea Flower Show. In 2007, David Austin received an OBE in the Queen’s Birthday Honours List and in 2010, he was honored as a Great Rosarian of the World.

We have three offices worldwide and a presence in almost every rose growing country in the world. David Austin’s head office is in Shropshire, England, where the company displays the National Collection of English Roses in two acres of themed rose gardens, open to the public free of charge. We have regional offices in Japan and the USA.

BARE ROOTS

Roses are sold in pots all year round but many garden centres and mail order specialists still sell roses as ‘bare root’, bagged or freshly potted during winter months. This is the time of year when the best range of roses is available and prices are keen.

Whether you buy bare root or potted, there’s no doubt that care at planting time makes a huge difference to how your roses will perform. Careful soil preparation is the key. See page 54 for advice.
David Austin’s ‘Graham Thomas’ received the highest accolade in the rose world when it was voted the World’s Favourite Rose by the World Federation of Rose Societies (WFRS). Founded in 1968, the WFRS represents over 100,000 rose lovers in 41 member countries. The award was announced at the 2009 World Rose Convention in Vancouver, when the rose was inducted into the society’s ‘Rose Hall of Fame’. It holds this prestigious title for three years.

The cup-shaped blooms of this well-loved English Rose have an unusually rich, pure yellow colour which is not found in the Old Roses and is rare, even among modern roses. The strong, fresh tea rose fragrance received the Henry Edland medal. ‘Graham Thomas’ forms an upright, bushy shrub which can be maintained at 1.5 x 1.25m with summer pruning. It is highly versatile and can also be trained as a spectacular climbing rose, ideal for a wall, rose pillar, obelisk or fence. It enjoys full sun but like all David Austin’s English Roses, it will also perform well in partial shade, provided it is not planted directly underneath the canopy of trees.

The rose was named for one of the leading British horticulturalists of the 20th century. The late Graham Thomas, born in 1909, was an enthusiastic collector of Old Roses and a frequent visitor to David Austin’s Nursery in Albrighton, England.
Using David Austin English Roses in the Australian Garden

English Roses are remarkably adaptable plants, growing in extreme climates around the world. Once they become well established in the garden, which usually takes a year or so, they are remarkably drought tolerant, though they will reward extra care by being more floriferous. They can be used to excellent effect, in a wide variety of ways. Here are a few suggestions that you may find helpful.

Mixed Borders
English Roses are shrub roses and so look particularly at home in a mixed border; indeed, this is where most people grow them. Their sumptuous blooms provide a welcome contrast to the lighter and more airy flowers of most perennials. The softer colours of the English Roses harmonise perfectly with the colours of most other plants. They have the great benefit of continuing to flower when many plants and shrubs are over. No rose likes too much competition and it is advisable to surround them with plants that are not too invasive. Wherever possible, we advise planting in groups of three or more although, in small borders, single plants are very satisfactory.

Rose Borders
A border of English Roses is hard to beat for sheer exuberance of flower and fragrance. The roses will flower from late spring/early summer through to the cooler weather of winter, providing a whole range of delicious fragrances. Some people prefer to use a limited range of harmonising colours, such as only varieties of white, blush pink, pink, crimson and purple, or just white, yellow, apricot and peach - but this is in no way essential. With the sophisticated shades of the English Roses, a mixture of the whole range of colours works wonderfully well. Always plant in groups of three or more, if space permits, to create structure and movement in the border and enable each variety to make a definite statement.

Rose Beds
There are a number of English Roses that grow, even in the warmer summers of Australia, to no more than 1–1.3m, which make wonderful bedding roses: Darcey Bussell, Miss Alice, Molineux, Munstead Wood, Sophy’s Rose and so on. These are short and bushy and repeat-flower well. In larger beds, the range of possibilities becomes much wider and taller varieties can be used.
**Rose Gardens**
For those of us who have sufficient space, it is possible to plant a rose garden entirely or partly of English Roses. This may be a conventional rose garden or perhaps two long borders facing a path and intersected occasionally with other paths. Such a garden could be quite small, or something altogether more extensive.

**As Climbers (Pillars)**
One of the most important developments in English Roses (and especially in Australia where the summer temperatures are higher than in the UK) has been the use of these roses as climbing roses. They usually reach a height of about 2.5 - 3 metres, which is ideal for people who would not wish to climb tall ladders. We can view the blooms to perfection as they will be growing more or less at eye level. English Rose climbers flower freely and continuously, branching all along the stem.

**Standard Roses**
We know of no better roses than English Roses for growing as Standard Roses. Being naturally wide and bushy, they form extra large heads. English Standard Roses are excellent for giving height in the garden. They may also be used as a focal point, or planted at intervals along the edge of a path.

**For Pots and Containers**
Plants in large pots or planters on hard areas around the house have become increasingly popular in recent times. Many of us, particularly in large cities, have either very small gardens or a patio garden. English Roses, with their bushy growth, are particularly good for this purpose.

**As a Hedge or for Lining a Path**
Some of the stronger English Roses form excellent hedges. They will produce a mass of colour throughout the summer. Such hedges may be used along the front of a garden facing the road, or to divide one part of the garden from another.

**As Cut Flowers**
English Roses are wonderful cut flowers, although they have a relatively short vase life when cut fresh from the garden. They are less stiff in growth than most modern roses and so are perfect for creating graceful arrangements. What better way of enjoying the beauty and fragrance of the individual flowers than arranging them in a bowl for the house?
An exciting development in recent years has been our release of an entirely new type of rose, bred for cutting, with longer vase life and great character and charm. Our new luxury roses are wonderful for events, weddings and gift bouquets and are increasingly available in Australia. Cut rose varieties are not available as plants for the garden. See p57 for more information.
New English Roses for 2011

Princess Alexandra of Kent ♣
Unusually large, very full-petalled flowers of warm, glowing pink. These are deeply cupped, with a ring of soft pink outer petals enclosing the inner ones. Plant in groups of three to keep the flowers and growth nicely balanced. The delicious Tea fragrance develops notes of lemon and blackcurrants. A very healthy variety.

The name:
We were honored to name this rose for Princess Alexandra, who is a cousin of Queen Elizabeth II. She is a keen gardener and great lover of roses.

Awards:
Winner of the fragrance award at the 2009 Glasgow, Scotland trials
Claire Austin ✿
Repeat-flowering climber. Large, creamy white blooms with English Musk delicacy. These have a strong myrrh fragrance with hints of meadowsweet, vanilla and heliotrope. Glossy green foliage. This is an elegant, very healthy variety, named for David Austin’s daughter.

Height: 2.5m
Bloom size: Large
Petal count: 120
Repeating: Very good
Fragrance: Strong, myrrh with vanilla
Uses: Pillars, obelisks, walls, trellises, post and rail fences
Aspect: Any open aspect
Appellation: Ausprior ⬑
Hybridiser: David Austin 2007

Skylark ✿
Semi-double flowers with an open cup shape. Their colour is deep pink at first, later paling to lilac pink, with a cluster of prominent golden stamens, beautifully highlighted against a clear white centre. The growth is light and airy, building up into a natural, well-rounded shrub. An ideal choice for the front of a mixed border, combined with other shrubs and flowering plants.

Height: Medium
Habit: Bushy
Bloom size: Medium
Petal count: 25
Repeating: Very good
Fragrance: Light, musk, clove and Tea
Uses: Flower beds, rose borders, landscaping
Position: Full sun, partial shade
Appellation: Ausimple ⬑
Hybridiser: David Austin 2007
Young Lycidas

A sensational variety with large flowers that are deeply cupped, even when fully open. Their colour is new to English Roses: a mix of very deep magenta, pink and red – the outermost petals a light purple – creating a beautiful contrast with the silvery outside of the petals. A healthy variety.

Height: Medium  
Habit: Bushy, arching  
Bloom size: Large  
Petal count: 90  
Repeating: Very good  
Fragrance: Strong, complex  
Uses: Flower beds, rose borders, containers, landscaping, scented gardens  
Position: Full sun, partial shade  
Appellation: Ausvibrant  
Hybridiser: David Austin 2008

Awards:
‘Young Lycidas’ was awarded the top prize for fragrance at the 2009 Concurs Internacional de Roses, in Barcelona, Spain. The fragrance starts as pure Tea, later becoming a well-balanced mixture of Tea and Old Rose with hints of cedar wood.
Wisley 2008 🌹
This is a rose of exceptional delicacy and charm bearing some resemblance to the old Alba Roses. Perfect, shallowly cupped rosettes are held in small clusters. The color is a very pure, soft pink, the outer petals paling a little towards the edge. There is a fresh, fruity fragrance with hints of Tea and raspberry. A fine and very healthy shrub rose.

Height: Large
Habit: Bushy, upright
Bloom size: Medium
Petal count: 95
Repeating: Excellent
Fragrance: Medium, fruity
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausbreeze ⚖️
Hybridiser: David Austin 2008

Sir John Betjeman 🌹
A rose with a more modern character than most English Roses. The flowers are produced very freely and are held in small clusters. The full-petalled, wide open rosettes are a bright, deep pink which, unusually, intensifies with age. This healthy variety is a superb choice for creating a bright splash of colour.

Height: Small
Habit: Bushy, rounded
Bloom size: Large
Petal count: 130
Repeating: Excellent
Fragrance: Light, green
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausvivid ⚖️
Hybridiser: David Austin 2008
English Roses are easy to grow, adaptable and highly versatile. When grown as shrubs, they can be used in a wide variety of ways: in mixed flower beds, traditional rose borders or in large decorative planters around the yard. A massed collection of English Roses looks quite superb when trained against a long post and rail fence - this is one of the many ways we display them at our UK nursery. Some varieties make beautiful fragrant, thorny hedges, while most are ideal for landscaping projects.

In this section of the catalogue, we have classified each variety as small, medium or large to allow easy comparison between them. The gardener can adjust the height a rose will reach by pruning.

The heights and widths given in the Index of Roses on pages 60 - 61 are approximately the size a variety can be expected to reach in a Melbourne or Adelaide garden with average pruning. In a warmer climate, or with lighter pruning, the rose will naturally form a larger plant. Summer pruning will help maintain the desired height of the rose in warmer areas.
Eglantyne
One of the most beautiful English Roses with flowers of a delicate soft pink. At first they are like shallow saucers filled with small petals, later reflexing back to produce lightly domed flowers. A charming and delicate sweet Old Rose scent. Summer pruning is recommended.

Heritage
Cupped blooms of shell-like beauty: soft clear pink at the centre, while the outer petals are almost white. The beautiful fragrance has overtones of fruit, honey, myrrh and carnation. It is very hardy and almost thornless. Forms a good crop of hips if not dead-headed. Equally good as a climber. Summer pruning is recommended.

Scepter’d Isle
Pretty cupped flowers are produced freely and continuously, held well above the foliage. They are soft pink, paler on the outer petals, with golden stamens visible within. Very reliable, healthy and hardy. Summer pruning is recommended. The powerful myrrh scent was rewarded with the Royal National Rose Society’s Henry Edland Award.

Height: Medium
Habit: Upright, bushy
Bloom size: Large
Petal count: 45
Repeating: Excellent
Fragrance: Strong, myrrh
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausland ®
Hybridiser: David Austin 1996

Miss Alice
The soft pink blooms have a lovely rounded Old Rose fragrance, with hints of lily of the valley. A useful variety which remains compact and is ideal for the front of the border, for large pots and containers or may be grown as a short rose hedge to define different areas of the garden.

Height: Small
Habit: Bushy
Bloom size: Medium large
Petal count: 107
Repeating: Very good
Fragrance: Medium Old Rose
Uses: Bedding, mixed borders, containers, hedging
Position: Full sun, partial shade
Appellation: Ausjake ™
Hybridiser: David Austin 2000
The Mayflower 🌹
Charming, medium-sized, typically Old Rose flowers of light to medium rose pink. It starts to flower very early in the season, and is hardly ever without flower through to the end of the season. Performs best in the less humid areas of Australia. This modest rose is tough and has excellent disease resistance.

- Height: Medium
- Habit: Rounded, bushy
- Bloom size: Medium
- Petal count: 140
- Repeating: Excellent
- Fragrance: Strong, Old Rose
- Uses: Flower beds, rose borders, containers, landscaping, hedging
- Position: Full sun, partial shade
- Appellation: Austilly 🌹
- Hybridiser: David Austin 2001

Sharifa Asma 🌹
A beautiful variety with an Old Rose charm, which blooms almost continuously. The colour is the most delicate blush pink, paling almost to white at the edges. There is a distinctive, strong and very beautiful fragrance, which has fruity notes reminiscent of white grapes and mulberry.

- Height: Medium
- Habit: Upright, bushy
- Bloom size: Large
- Petal count: 90
- Repeating: Very good
- Fragrance: Very strong, complex, fruity
- Uses: Flower beds, rose borders, containers, small gardens, cutting
- Position: Full sun, partial shade
- Appellation: Ausreef 🌹
- Hybridiser: David Austin 1989
Wildeve
The very rain-resistant flowers are soft blush pink, tinged with apricot. They are a perfect rosette shape and distinctly quartered. ‘Wildeve’ has many of the features of a good ground cover rose, combined with the quality of flower of an English Rose. A particularly robust, healthy and hardy rose, well covered in blooms.

William Morris
Lovely soft glowing apricot pink blooms with a beautiful rosette shape. These are deeply cupped, the outer petals eventually reflexing back a little. There is a delicious Tea fragrance. This is a good rose for the back of the mixed border or may be grown as a short climber.

Pictured right: A garden of English Roses designed by Michael Marriott
Anne Boleyn
The soft warm pink flowers have a beautiful rosette shape and are held in large sprays. This is a very free-flowering variety, with short arching growth. The whole impression is one of pleasing freshness. This rose is particularly effective when displayed in a large container.

- **Height:** Small
- **Habit:** Arching
- **Bloom size:** Medium
- **Petal count:** 110
- **Repeating:** Very good
- **Fragrance:** Light, Old Rose
- **Uses:** Flower beds, rose borders, containers
- **Position:** Full sun, partial shade
- **Appellation:** Ausecret
- **Hybridiser:** David Austin 1999

Brother Cadfael®
Very large and sumptuous medium pink blooms. These are deeply cupped, with incurving petals. They are perfectly in proportion to the growth and foliage. A particularly strong, fine Old Rose fragrance, reminiscent of the old Bourbon Roses. Summer pruning is recommended to maintain it as a shrub, or it can be trained to form a short climber.

- **Height:** Large
- **Habit:** Vigorous, upright
- **Bloom size:** Large
- **Petal count:** 50
- **Repeating:** Very good
- **Fragrance:** Strong, Old Rose
- **Uses:** Flower beds, rose borders, containers, scented gardens
- **Position:** Full sun, partial shade
- **Appellation:** Ausglobe
- **Hybridiser:** David Austin 1990
Gertrude Jekyll 🌸
Strong, beautifully balanced Old Rose scent: the quintessential rose fragrance. Beautiful, large, rosette-shaped flowers of rich, glowing pink. We advise summer pruning, especially in hotter areas, where repeating is less good. It is superb as a shrub or a climber. Winner of the James Mason award for fragrance and voted England’s Favourite Rose.

- **Height:** Large
- **Habit:** Vigorous, upright
- **Bloom size:** Large
- **Petal count:** 80
- **Repeating:** Good
- **Fragrance:** Very strong, Old Rose
- **Uses:** Flower beds, rose borders, containers, scented gardens
- **Position:** Full sun, partial shade
- **Appellation:** Ausbord 🟢
- **Hybridiser:** David Austin 1986

Jubilee Celebration 🌸
Large, domed pink flowers with highlights of gold on the underside of the petals. Blooms are held well above the foliage and produced with exceptional freedom and continuity. Fruity rose fragrance with hints of lemon and raspberry. A fine, very healthy shrub. Winner of the fragrance prize and People’s Choice in Glasgow, Scotland.

- **Height:** Medium
- **Habit:** Rounded, bushy
- **Bloom size:** Large
- **Petal count:** 90
- **Repeating:** Very good
- **Fragrance:** Very strong, fruity
- **Uses:** Flower beds, rose borders, containers, landscaping, hedging
- **Position:** Full sun, partial shade
- **Appellation:** Aushunter 🟢
- **Hybridiser:** David Austin 2002
**Mary Rose**

One of the most widely grown English Roses and a first class garden shrub. Always amongst the first roses to bloom each spring, repeating very well. Attractive, loose-petalled blooms with a strong rose pink colouring. The delicious Old Rose scent has hints of honey and almond blossom.

- **Height:** Medium
- **Habit:** Bushy, rounded
- **Bloom size:** Large
- **Petal count:** 60
- **Repeating:** Excellent
- **Fragrance:** Strong, Old Rose
- **Uses:** Flower beds, rose borders, containers, landscaping, hedging
- **Position:** Full sun, partial shade
- **Appellation:** Ausmary
- **Hybridiser:** David Austin 1983

---

**Lady of Megginch**

An impressive variety with very large, richly coloured, cupped rosettes. These are a very rich rose pink, tinged with orange at first. A good, fruity Old Rose fragrance with raspberry notes. Depending on how hard it is pruned, it will grow into a medium or large shrub of good, bushy habit. It is vigorous and healthy.

- **Height:** Medium
- **Habit:** Rounded, bushy
- **Bloom size:** Large
- **Petal count:** 100
- **Repeating:** Very good
- **Fragrance:** Medium, fruity Old Rose
- **Uses:** Flower beds, rose borders, containers, landscaping, hedging
- **Position:** Full sun, partial shade
- **Appellation:** Ausvolume
- **Hybridiser:** David Austin 2006
Sophy’s Rose

This beautiful rose flowers very freely and, because it repeats so quickly, never grows too tall. The wide, rosette-shaped flowers are an attractive light red colour, fading to deep pink. The excellent, short, bushy growth makes this rose the perfect choice for bedding and the front of borders. Extremely healthy.

Height: Small
Habit: Bushy, upright
Bloom size: Large
Petal count: 80
Repeating: Excellent
Fragrance: Light, Tea
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Auslot
Hybridiser: David Austin 1997

Noble Antony

A short, bushy rose with dark foliage and flowers of a lovely mix of magenta pink and crimson. The blooms are full-petalled, the outer petals eventually turning back to create a very attractive, perfectly formed dome shape. The compact habit and upwards facing blooms make this rose a great choice for bedding and the front of borders. Very healthy.

Height: Small
Habit: Bushy
Bloom size: Medium
Petal count: 85
Repeating: Very good
Fragrance: Rich, Old Rose
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Ausway
Hybridiser: David Austin 1995
Strawberry Hill 🌹
Pure rose pink, cupped rosettes of superb quality, the colour gradually paling to a lighter pink at the edges. It has a particularly fine myrrh fragrance with lemon notes. Winner of a Prix d’Honneur at the fragrance trials in Nantes, France and a Gold Standard Award in the UK. It is extremely healthy. Summer pruning is recommended.

Height: Medium
Habit: Bushy, well branched
Bloom size: Large
Petal count: 85
Repeating: Very good
Fragrance: Very strong, myrrh
Uses: Flower beds, rose borders, containers, landscaping
Position: Full sun, partial shade
Appellation: Ausrimini ♂
Hybridiser: David Austin 2006
The Alnwick® Rose
Pretty, deeply cupped flowers that later open into broad, full-petalled, shallow cups. The colour is a soft pink which is paler at the outer edges. The Old Rose fragrance has a delightful hint of raspberry. Remains compact and blooms freely until late in the year. Enjoys the warm Australian climate.

- **Height:** Medium
- **Habit:** Bushy, upright
- **Bloom size:** Large
- **Petal count:** 120
- **Repeating:** Excellent
- **Fragrance:** Strong, Old Rose
- **Uses:** Flower beds, rose borders, containers, landscaping, hedging
- **Position:** Full sun, partial shade
- **Appellation:** Ausgrab
- **Hybridiser:** David Austin 2001

The Endeavour
An extremely floriferous variety that was first released in Australia as it particularly enjoys a warm climate. The blooms are strongly coloured: the upper sides are a salmon pink shade while the reverses are a soft yellow, creating a beautiful contrast that is further heightened by the dark green foliage. There is a spicy fragrance.

- **Height:** Medium
- **Habit:** Bushy, compact
- **Bloom size:** Large
- **Petal count:** 49
- **Repeating:** Very good
- **Fragrance:** Medium, spicy
- **Uses:** Flower beds, rose borders, containers, landscaping
- **Position:** Full sun, partial shade
- **Appellation:** Ausdisco
- **Hybridiser:** David Austin 2006
Benjamin Britten
This variety has an unusual colouring for an English Rose. The open, cupped rosettes are a beautiful soft scarlet, eventually changing to a strong shade of pink. There is an intensely fruity fragrance with aspects of wine and pear drops. It can be grown as either a shrub, which will benefit from summer pruning, or as a climber.

Height: Medium
Habit: Bushy, upright
Bloom size: Large
Petal count: 60
Repeating: Very good
Fragrance: Medium, fruity
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausencart
Hybridiser: David Austin 2001

Darcey Bussell
One of the best and healthiest of the red roses we have bred to date. The flowers are produced freely and with excellent continuity. When young, their outer petals form a perfect ring, later developing into a beautiful rosette. The colour is a deep, rich crimson later developing a tinge of mauve. It has a pleasing, fruity fragrance.

Height: Small
Habit: Bushy, upright
Bloom size: Large
Petal count: 70
Repeating: Excellent
Fragrance: Medium, fruity
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausdecorum
Hybridiser: David Austin 2006
Falstaff 🌹
Magnificent, beautifully cupped, very full flowers of rich, dark crimson, eventually developing hints of rich purple. There is a powerful Old Rose fragrance. It is healthy with strong, upright stems, forming a substantial bushy shrub or an excellent climber. Summer prune to maintain the height when grown as a shrub.

Height: Medium
Habit: Upright, bush
Bloom size: Large
Petal count: 110
Repeating: Good
Fragrance: Strong, Old Rose
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Ausverse ™
Hybridiser: David Austin 1999

L.D. Braithwaite 🌹
Beautiful wide blooms of the brightest crimson, standing out when viewed across the garden. They are produced freely and with remarkable continuity. There is a light scent until the flower ages, when it develops a charming Old Rose character. Performs well in warm climates. Very healthy and reliable.

Height: Small
Habit: Bushy, upright
Bloom size: Large
Petal count: 80
Repeating: Excellent
Fragrance: Light, Tea
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Auscrim ™
Hybridiser: David Austin 1984

Tess of the d’Urbervilles 🌹
Bright crimson, deeply cupped blooms, with the outer petals eventually reflexing back. These have a lovely Old Rose fragrance. The growth is vigorous, forming a rounded shrub which will benefit from summer pruning. It may also be grown as a lovely short climbing rose.

Height: Medium
Habit: Well branched, arching
Bloom size: Large
Petal count: 110
Repeating: Very good
Fragrance: Medium, Old Rose
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Ausmove ™
Hybridiser: David Austin 1998
Munstead Wood  *
Light crimson buds gradually open to reveal deepest velvety crimson petals at the centre of the bloom, while the outer petals remain lighter in colour. The rosette-shaped blooms are deeply cupped at first, becoming more shallowly cupped with time. Our fragrance expert, Robert Calkin, assesses the Old Rose scent of this rose as ‘warm and fruity with blackberry, blueberry and damson notes’. Good disease resistance. The younger leaves are red-bronze, giving a nice contrast.

**Height:** Small  
**Habit:** Bushy  
**Bloom size:** Medium large  
**Petal count:** 74  
**Repeating:** Very good  
**Fragrance:** Strong, Old Rose  
**Uses:** Flower beds, rose borders, containers, landscaping  
**Position:** Full sun, partial shade  
**Appellation:** Ausbernard  
**Hybridiser:** David Austin 2007

The Dark Lady  *
This variety varies in colour from a dark crimson in the cooler areas to a very rich, deep pink in warmer areas. The large, sumptuous, fragrant blooms have many perfectly arranged petals. It enjoys the warm climate of Australia, where it forms an attractive, rounded and well branched shrub.

**Height:** Medium  
**Habit:** Rounded, bushy  
**Bloom size:** Large  
**Petal count:** 140  
**Repeating:** Very good  
**Fragrance:** Medium, Old Rose  
**Uses:** Flower beds, rose borders, containers, landscaping  
**Position:** Full sun, partial shade  
**Appellation:** Ausbloom 📚  
**Hybridiser:** David Austin 1991
The Prince
Deepest crimson blooms that go on to develop rich royal purple tones. The very full-petalled, cupped flowers have a beautiful rosette form. This rose has the glorious Old Rose fragrance associated with some of the darker Gallica roses. It will benefit from generous treatment.

Height: Small
Habit: Bushy
Bloom size: Large
Petal count: 125
Repeating: Very good
Fragrance: Strong, Old Rose
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Ausvelvet ⚓
Hybridiser: David Austin 1986

William Shakespeare 2000 ⚓
A superb variety with exquisite blooms of the richest, velvety crimson, which may become a very rich shade of pink in warmer areas. Deeply cupped at first, opening out to a shallow, quartered cup. This rose has a classic, strong, warm Old Rose fragrance. Performs best in areas with less humidity.

Height: Medium
Habit: Bushy, well branched
Bloom size: Large
Petal count: 120
Repeating: Very good
Fragrance: Strong, Old Rose
Uses: Flower beds, rose borders, containers, landscaping
Position: Full sun, partial shade
Appellation: Ausromeo ⚓
Hybridiser: David Austin 2000
A Shropshire Lad 🌸
A strong growing, healthy shrub with large, glossy, dark green leaves and few thorns. Very attractive, cupped rosettes. Their colour is a soft peachy pink with paler outer petals. The fragrance is a delicious blend of fruit with Tea. In every way an excellent, hardy and reliable shrub. May also be grown as a glorious short climber.

Height: Large
Habit: Bushy, arching, well branched
Bloom size: Large
Petal count: 90
Repeating: Good
Fragrance: Medium, fruity Tea
Uses: Flower beds, back of the rose border
Position: Full sun, partial shade
Appellation:Ausled 🇦🇺
Hybridiser: David Austin 1996

Summer pruning:
‘A Shropshire Lad’ and many of the more vigorous English Roses respond well to summer pruning, especially in warmer areas. After flowering, cut back the stems by between 45 and 60cm, leaving two or three leaves of the current season’s growth. This helps to maintain a nice shrubby shape and encourage quicker repeating.
Abraham Darby 🌹
Few roses make such a fine display or produce such magnificent blooms as ‘Abraham Darby’. It produces many, very large, cup-shaped flowers in shades of apricot and yellow, later tinted with pink. A rich, fruity fragrance with a refreshing sharpness. Vigorous and hardy. Summer pruning is recommended.

Height: Large
Habit: Well branched, rounded, bushy
Bloom size: Large
Petal count: 70
Repeating: Very good
Fragrance: Strong, fruity
Uses: Flower beds, rose borders, containers, landscaping
Position: Full sun, partial shade
Appellation:Auscot
Hybridiser: David Austin 1985

Ambridge Rose 🌹
Lovely apricot-pink flowers that are a very soft, pale pink towards the outer edges. They are neatly cupped, opening out into a very attractive rosette. There is a fine English Rose myrrh fragrance. A tough, free-flowering and altogether trouble-free rose. It performs very well in warmer climates, but prefers less humidity.

Height: Small
Habit: Rounded, bushy
Bloom size: Large
Petal count: 80
Repeating: Very good
Fragrance: Strong, myrrh
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Auswonder
Hybridiser: David Austin 1990

Christopher Marlowe 🌹
The rosette-shaped blooms start an intense orange-red, which pales first to salmon-pink and finally to soft pink. The underside of the petals are soft yellow, creating an interesting contrast in the button-eye centre. Tea fragrance with a hint of lemon. An attractive, well-rounded and free-flowering shrub.

Height: Small
Habit: Arching, bushy growth
Bloom size: Large
Petal count: 70
Repeating: Very good
Fragrance: Light, Tea
Uses: Flower beds, borders, containers, landscaping
Position: Full sun, partial shade
Appellation: Ausjump
Hybridiser: David Austin 2002
Crown Princess Margareta 🌹
Neatly formed, full rosettes of a lovely apricot-orange, paling to soft yellow. They have a wonderful, fruity Tea Rose fragrance. It is very reliable and healthy, thriving even under tough conditions. Summer pruning is recommended to maintain it as a shrub. May also be grown as an excellent short climber.

Height: Large
Habit: Vigorous, rounded, arching
Bloom size: Large
Petal count: 120
Repeating: Good
Fragrance: Strong, fruity Tea
Uses: Flower beds, back of the rose border
Position: Full sun, partial shade
Appellation: Auswinter 🌹
Hybridiser: David Austin 1999

Evelyn
Neatly formed, full rosettes of a lovely apricot-orange, tinged with soft pink. These have a complex fragrance similar to Old Rose but with sumptuous notes of peaches and apricots. It is well suited to the warmer climate of Australia, where it is reliable and healthy, thriving even under tough conditions. Summer prune to maintain it as a shrub. May also be grown as a short climber.

- **Hybridiser:** David Austin 2003
Golden Celebration 🌸
Magnificent, rich golden yellow blooms in the form of giant, full-petalled cups. The glorious Tea fragrance has a deliciously fruity character, with hints of citrus, strawberry and lychee. Very reliable and easy to grow. A winner of several prizes. Summer pruning is recommended when grown as a shrub. It can also be grown as a first class climber. Remove any hips that form to encourage better repeat-flowering.

Height: Medium  
Habit: Rounded, slightly arching  
Bloom size: Large  
Petal count: 75  
Repeating: Very good  
Fragrance: Very strong, fruity Tea  
Uses: Flower beds, rose borders, containers, scented gardens  
Position: Full sun, partial shade  
Appellation: Ausgold 🌹  
Hybridiser: David Austin 1992

Graham Thomas 🌸
One of the most widely grown English Roses. The unusually rich pure yellow, cupped flowers have a strong Tea Rose fragrance. It can be trained as an excellent climber and benefits from summer pruning if grown as a shrub. Winner of the prestigious James Mason award and voted The World’s Favourite Rose (see page 3).

Height: Large  
Habit: Vigorous, upright, well branched  
Bloom size: Large  
Petal count: 45  
Repeating: Very good  
Fragrance: Strong, Tea  
Uses: Flower beds, rose borders, containers  
Position: Full sun, partial shade  
Appellation: Ausmas  
Hybridiser: David Austin 1983
Jude the Obscure
Magnificent flowers with an incurved, chalice shape. These are buff yellow with a paler yellow on the outside. Prized for the quality and strength of its fruity fragrance, which has notes of citrus, guava and sweet white wine. Excellent, strong, healthy growth. Summer pruning recommended. May also be trained to form a fragrant climbing rose.

Height: Medium
Habit: Bushy, rounded, well branched
Bloom size: Large
Petal count: 70
Repeating: Very good
Fragrance: Very strong, complex, fruity
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Ausjo
Hybridiser: David Austin 1995

Molineux
Beautiful rich yellow rosettes are produced with exceptional freedom and continuity. Very healthy and reliable, performing well in all areas. Winner of a Gold Medal, the President’s Trophy for the Best New Rose of the Year and the Henry Edland Medal for the Best Scented Rose at the Royal National Rose Society trials in England.

Height: Small
Habit: Bushy, upright
Bloom size: Large
Petal count: 120
Repeating: Excellent
Fragrance: Medium, musky Tea
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausmol
Hybridiser: David Austin 1994
Teasing Georgia ☀️
A refined rose of delicate beauty, with cupped rosettes of a particularly attractive formation. The centre petals are rich yellow, while the outer ones fade to palest yellow. The growth is strong but graceful. Can also be trained to form an excellent short climber. When grown as a shrub, summer pruning will keep it compact. Good disease resistance and very hardy. Winner of the Henry Edland Medal for fragrance.

Height: Medium
Habit: Rounded, arching bushy
Bloom size: Large
Petal count: 110
Repeating: Very good
Fragrance: Strong, Tea
Uses: Flower beds, rose borders, landscaping
Position: Full sun, partial shade
Appellation: Ausbaker ☐
Hybridiser: David Austin 1998

The Pilgrim ☀️
Perfectly formed blooms, shallowly cupped and rosette-shaped. The beautiful yellow colour pales towards the edges of the bloom, creating a softness that is rare among yellow roses. The fragrance is a delicious mix of Tea and the classic myrrh scent. Very healthy and reliable. Summer pruning is recommended. Can also be trained to form a superb climbing rose.

Height: Large
Habit: Upright, bushy
Bloom size: Large
Petal count: 140
Repeating: Good
Fragrance: Strong, Tea with myrrh
Uses: Flower beds, rose borders, containers
Position: Full sun, partial shade
Appellation: Auswalker ☐
Hybridiser: David Austin 1987
Crocus Rose 🌹 A robust, free-flowering rose, bearing beautiful, large rosettes held in clusters, elegantly poised on slightly arching stems. These are initially soft apricot in the centre, with cream outer petals, quickly turning creamy white. Light Tea Rose fragrance. Great for all climates. Summer pruning is recommended.

- **Height:** Medium
- **Habit:** Rounded, bushy, well branched
- **Bloom size:** Large
- **Petal count:** 110
- **Repeating:** Excellent
- **Fragrance:** Light, Tea
- **Uses:** Flower beds, rose borders, containers, landscaping
- **Position:** Full sun, partial shade
- **Appellation:**Ausquest 🇦🇺
- **Hybridiser:** David Austin 2000

Glamis Castle 🌹 Medium-sized, full, cupped flowers of dainty appearance. These are white, sometimes lightly tinted with buff at first. It has a light myrrh fragrance. The growth is also dainty, but deceptively robust and bushy. It flowers freely and with exceptional continuity. Excels in warmer areas but prefers lower humidity.

- **Height:** Small
- **Habit:** Rounded, bushy
- **Bloom size:** Medium
- **Petal count:** 120
- **Repeating:** Excellent
- **Fragrance:** Light, myrrh
- **Uses:** Flower beds, rose borders, containers, landscaping
- **Position:** Full sun, partial shade
- **Appellation:** Auslevel 🇦🇺
- **Hybridiser:** David Austin 1992
Lichfield Angel

Deep cups open to neat rosettes which then, as the petals turn back, form beautiful dome shapes. Their colour is creamy apricot at first, later paling to creamy white. The overall effect in the mass is almost pure white. A light, clove fragrance. ‘Lichfield Angel’ enjoys the warm Australian climate, forming an attractive, rounded shrub.

Height: Medium
Habit: Vigorous, rounded, bushy
Bloom size: Large
Petal count: 100
Repeating: Excellent
Fragrance: Light, clove
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Ausrelate &
Hybridiser: David Austin 2006

The name:
‘Lichfield Angel’ was named to commemorate a limestone sculptured panel, dating from the 8th century, which was recently discovered in Lichfield Cathedral, near to our UK nursery.
Windermere®
A particularly free-flowering variety that will continue to flower until very late in the season. The full, cupped flowers are rich cream at first, fading to almost pure white. The strong, delicious, fruity fragrance has a definite hint of citrus. It produces many basal shoots with few thorns. Very healthy, remaining compact even in warmer areas.

Height: Small
Habit: Rounded, bushy
Bloom size: Large
Petal count: 80
Repeating: Very good
Fragrance: Strong, fruity
Uses: Flower beds, borders, containers, landscaping
Position: Full sun, partial shade
Appellation: Aushomer ⚒
Hybridiser: David Austin 2007

Winchester Cathedral®
A lovely white sport of ‘Mary Rose’, sometimes with the slightest touch of pink at the centre. The overall effect is of a mass of flowers held on a bushy shrub, which blooms at regular intervals throughout the season. The strong and delicious Old Rose fragrance has hints of honey and almond blossom.

Height: Medium
Habit: Rounded, bushy
Bloom size: Large
Petal count: 85
Repeating: Excellent
Fragrance: Strong, Old Rose
Uses: Flower beds, rose borders, containers, landscaping, hedging
Position: Full sun, partial shade
Appellation: Auscat
Hybridiser: David Austin 1988
The Renaissance Garden with Golden Celebration in the foreground
Some English Roses make the most excellent climbers and indeed we believe they are, as a group, the best of all climbing roses. They are vigorous, without being too tall, and so are easy to manage. They also have a remarkable ability to flower all the way down to the base of the plant. They are very generous with the number of stems they produce from the base and so there is plenty to work with when fanning them out on a wall, trellis or fence. They are also ideal for obelisks, arches or pillars.

**A Shropshire Lad Clg.**
Repeat-flowering. Perfectly formed, soft peachy pink rosettes with a strong, delicious, fruity Tea Rose fragrance. plentiful glossy foliage, with few thorns. A superb climber that is extremely tough, healthy and reliable.

- **Main listing:** See page 26
- **Height:** 3m
- **Uses:** Arches, pillars, obelisks, walls, trellises, post and rail fences
- **Aspect:** Any open aspect
- **Appellation:** Ausled 🌆

**Aspect:**
*English Climbing Roses are suitable for any open aspect, including South facing walls. Some shade to protect from the heat of the afternoon sun may be beneficial.*

*A Shropshire Lad Climbing*
Benjamin Britten Clg.®
Repeat-flowering. This rose has an unusual colour: soft crimson, later becoming a strong shade of pink. The blooms have a powerful, intensely fruity fragrance. Very healthy. Won a Best Climber Award in Adelaide, Australia.

- Main listing: See page 22
- Height: 2.5 – 3m
- Uses: Arches, pillars, obelisks, walls, trellises, post and rail fences
- Aspect: Any open aspect
- Appellation: Ausencart ®

Brother Cadfael® Clg.®
Repeat-flowering. Very large, sumptuous blooms of rich pink with a particularly strong Old Rose fragrance. Strong, upright growth that can easily be trained sideways once the stems are mature.

- Main listing: See page 16
- Height: 2.5m
- Uses: Pillars, obelisks, walls, trellises, post and rail fences
- Aspect: Any open aspect
- Appellation: Ausglobe

Claire Austin Clg.®
New for 2011
Repeat-flowering. Large, creamy white blooms with English Musk delicacy. Strong myrrh fragrance with hints of meadowsweet, vanilla and heliotrope. This is an elegant, very healthy climber.

- Main listing: See page 7
- Height: 2.5m
- Uses: Pillars, obelisks, walls, trellises, post and rail fences
- Aspect: Any open aspect
- Appellation: Ausprior ®

Ways of using English Roses – Hedges

David Austin’s English Roses are very versatile roses. Here we highlight some creative ways to use them in the garden.

English Rose hedges are very valuable in the garden. Unlike most other hedges, they repeat flower prolifically, producing flushes of glorious, fragrant blooms. They have attractive, healthy green foliage and their thorns will act as a deterrent to intruders.

In recent years, David J.C. Austin has developed a passion for growing English Roses as hedges and can frequently be heard enthusing about their great beauty. He has planted several varieties in his private garden: the photograph below of ‘The Alnwick® Rose’ was taken there, growing along both sides of a path.

Rose hedges benefit enormously from good feeding and watering, like any other roses. When planting, space the shorter varieties about 50 - 75cm apart and the taller varieties about 1m apart.

Pruning hedges is very easy. English Roses are very forgiving plants and can be trimmed using a hedge trimmer. Remove any weak or dead stems. The final height of the hedge can be adjusted by pruning harder or more lightly. After a few years, some thinning may be required.
Container gardening has never been more popular. English Roses, with their long flowering season, are highly effective containerised plants, bringing character and interest to the garden. It is a great way to enjoy their beautiful, often deliciously fragrant flowers at close quarters.

Group a number of containerised roses together to create the impression of a garden. Place them at entrances, in seating areas or use to decorate paths or large areas of gravel and paving.

When growing English Roses, always choose a large container (at least half a barrel) as this will give the roots more room to develop and help to prevent the soil drying out too quickly. Although plastic pots are lighter and easier to move, clay pots, barrels or urns can be very attractive and will be more stable in windy conditions.

We recommend roses are planted in a good quality potting mix. A slow release fertiliser should be applied. Fit drip irrigation or water regularly, especially during the summer when they may need to be watered every day. Prune back by at least half when spring growth begins.
English Roses are rarely more beautiful than when they are combined with other flowering plants in the garden. All the roses listed in the shrub section of this catalogue can be very successfully incorporated into mixed flower beds. They generously produce flushes of blooms, providing colour and interest over a long season. We recommend shrub roses are planted in compact groups of the same variety to create bold splashes of colour and to balance drifts of perennials.

English Roses have some of the most complex and delicious fragrances of any garden plant. Their natural, shrubby growth and graceful bushy habit makes them perfect for the mixed border. Their pure, glowing colours harmonise with a wide range of companion plants; their magnificent cupped and rosette blooms contrasting well with the airier flowers of many perennials. When combined with the gardener’s favourite flowers and shrubs, they create a wonderful array of colour, form, texture and scent.

Roses are very effective when shorter companion plants are used around them. The taller English Roses provide height and structure without the need for staking, while the more compact varieties are perfect for the front of the border. Many of the annuals and perennials traditionally found in mixed borders attract beneficial insects into the garden which will help to keep the roses healthy.
English Roses for Landscaping

English Roses offer a rare blend of beauty, grace and functionality which far exceeds most other flowering plants. This makes them very useful in all kinds of planting schemes. These glorious roses can transform public land into enchanting outdoor spaces. At home, a fragrant rose garden creates an idyllic place to relax with family and friends.

Any of the English Roses marked 🌸 in their descriptions are highly recommended for landscaping in the Australian climate. Here we highlight some of our favourite, low-maintenance English Roses, all of which are suitable for landscaping large areas. They have beautiful blooms; excellent repeat-flowering; are very tough, reliable and healthy and are often very fragrant too.

CHARLOTTE (soft yellow)
CROCUS ROSE (creamy white)
DARCEY BUSSELL (crimson)
EGLANTYNE (blush pink)
GRACE (shades of apricot)
JUBILEE CELEBRATION (pink)
L.D. BRAITHWAITE (bright crimson)
LICHFIELD ANGEL (creamy white)
MARY ROSE (pink)
MOLINEUX (yellow)
PRINCESS ALEXANDRA OF KENT (pink)
SCEPTER’D ISLE (blush pink)
SIR JOHN BETJEMAN (bright pink)
SOPHY’S ROSE (deep pink)
STRAWBERRY HILL (pink)
TEASING GEORGIA (yellow)
The Alnwick® Rose (pink)
The Dark Lady (crimson; for warm areas)
The Mayflower (pink; for cooler areas)
WILDEVE (blush pink)
WILLIAM SHAKESPEARE 2000 (crimson)
WINCHESTER CATHEDRAL (white)
WISLEY 2008 (blush pink)
YOUNG LYCIDAS (magenta pink)

Please see the individual variety descriptions for more information.

A garden full of English Roses
ROSES FOR SPECIFIC POSITIONS

We are often asked to recommend roses for different purposes in the garden. Here is a list of roses you might like to consider, although there are other varieties which will also perform well.

Shrub roses for shady positions:
If planting in partial shade, always choose a spot that is not overhung by the branches of trees and where there is not too much competition at the roots:

Climbers for shady positions:
Most varieties of English Climbing Roses grow and flower very well in north facing positions or areas of partial shade that receive 3-4 hours of sun per day. We particularly recommend the following:

Climbers for pillars, obelisks or arches:
Always consider the height of the structure when selecting roses to grow against them. All the English Climbing Roses are suitable, especially:

Roses with the strongest fragrance:
English Roses are renowned for the strength and complexity of their fragrances, which include Old Rose, Tea Rose, musk, myrrh and fruity, or may be a delicious blend. Here are some of the best:
Roses for bedding:
Ambridge Rose, Charlotte, Darcey Bussell, Mary Rose, Molineux, Sophy’s Rose, Winchester Cathedral.

Thornless roses:
These roses are completely thornless, or nearly so. These varieties can all be grown as shrubs or trained as climbers:
A Shropshire Lad, Heritage, Tea Clipper.

Garden roses for cutting:
Almost any double-flowered rose is suitable for cutting to create arrangements for the home. Roses are very beautiful when cut freshly from the garden, but have a very short vase life, so we recommend that they are plunged in a bucket of water as soon as they have been cut to help extend their lives. These are some of our favourites:

A listing of our new luxury cut roses can be found on page 57. Please note that these are only available as stems for bouquets, events and weddings, not as garden plants.

English Standard Roses:
Standard Roses (sometimes known as Stem Roses) are a great way to add height to a border or can be used as specimens in a lawn or on either side of a path. English Roses have a natural growth habit and beautiful fragrant flowers, making them ideally suited to being grown in this way. In a large bed, a group of three or four planted closely together can be very effective. Here are some of our favourites:

Hedges
Roses make excellent hedges either as impenetrable barriers or as very floriferous internal boundaries within a garden. Shorter hedges form an attractive dividing wall, while taller hedges may require support from a fence or wire netting. Please see page 48 for more information. Here are some of our favourite hedging roses:
Roses are easy to grow and remarkably tolerant. To achieve good results, it is only necessary to get a few basic points right. However, roses will respond well to extra care and attention by being more floriferous and healthy. Here is our care advice for home gardeners.

**Planting Time**
Containerised roses can be planted all year round, although extra attention to watering will be required in hot spells until the roses are well established.

**Planting Position**
Select a site with at least four hours of sun each day, although in areas with hot summers shade from the afternoon sun can be beneficial. Generally roses will not flourish where their roots are in competition with the roots of other plants, especially trees and hedges.

**Planting Distances**
If you have the space English Roses look superb planted in groups of three or more of one variety. They will then grow together to form one dense shrub, which will provide a more continuous display and make a more definite statement in the border. Depending on the varieties and your climate we suggest planting about 1m apart within the group, leaving 1 - 1.5m between plants of neighbouring varieties.

**Soil Type**
Roses will grow in a wide range of soils, but they do appreciate good soil preparation. The addition of well rotted manure or garden compost before planting will help ensure strong growth.

**Planting**
Containerised roses should be soaked for 30 minutes or so just prior to planting. On arrival plant the bare root roses as soon as possible, never allowing the roots to dry out. When planted, the base of the stems should be about 3" below ground level in cold winter areas and at ground level in milder areas. If immediate planting is impossible, keep the roses in the sealed box in a cold but frost free place or heel the roses in. Water generously until the plant is well established. We recommend the use of David Austin’s ‘Start’.

**Planting in Containers**
See page 49 for information on this.

**Feeding, Mulching and Watering**
Feeding, generous mulching and occasional deep watering will help encourage strong growth and more flowers. Mulch in spring, preferably using well rotted manure or garden compost.

**Healthy Roses**
The best way to keep your roses healthy is to choose disease resistant varieties and grow them as well as possible. Excessive Nitrogen can make roses more susceptible to both pests and diseases. However, an occasional spray can help, the most effective being at the start of the season before symptoms develop. Beware of frosts the night after spraying - they will scorch the leaves badly. There are different chemicals and laws restricting their use, so we recommend that you seek the latest advice from your garden centre team, nursery or local rose society.

**Winter Pruning**
Pruning is very easy. The recommended time to prune is in July and August. On all plants, remove very weak, old and woody and dead and diseased stems.

**English Shrub Roses**
Prune back by between 1/3 and 2/3, depending on what height you would like your rose to reach next season. Each year remove some of the older stems to encourage fresh, new growth from the base.

**English Climbing Roses**
The previous year’s flowering shoots should be reduced to 3 or 4 buds or about 10 – 15cm and the strong, new stems tied in, cutting out older ones as necessary.

**Dead-heading**
Unless you particularly desire the winter colour that hips provide, we recommend that you aim to prevent hips from forming as these tend to reduce repeat-flowering. Dead-heading is the removal of spent flowers, which might otherwise go on to form hips. This not only encourages repeat-flowering, but also makes a tidier plant. Either remove just the dead flower, or cut the stems down to the first full leaf.

**Summer Pruning**
In warm climates it may be beneficial to summer prune by cutting back most of the spent flowering shoots about 50cm, leaving just about 15cm. This can be repeated through the season as the rose repeats flowers and will encourage more compact growth and quicker repeat-flowering.
Alongside David Austin’s Plant Centre in Shropshire, England we have created two acre gardens that are home to the National Collection of English Roses, with many other types of rose - over 700 different varieties in all. The gardens are divided into six themed areas, designed to provide inspiration for gardeners.

Although there are many other beautiful gardens worldwide with great collections of English Roses, there is probably no better place to enjoy so many of the 200 or more varieties we have introduced. The gardens are open all year round free of charge and are normally at their peak of flowering around the end of June.

Please try to allow time to call in and see us if you have a trip to England planned. David Austin’s Plant Centre, traditional tea rooms and rose breeding facilities are also on site.

**ENGLISH ROSES IN AUSTRALIA:**
- Mornington Botanical Rose Garden, VIC.
- Morwell Centenary Rose Garden, VIC.
- National Rose Garden, Longford, TAS.
- Old Parliament House Rose Garden, Canberra, ACT.
- Ruston Rose Garden, Renmark, SA.
- The Queensland State Rose Garden, Toowoomba, QLD.
- Victoria State Rose Garden, Weribee, VIC.

**AROUND THE WORLD**
Here are just a few of our favourites:

**FRANCE**
- Chateau du Rivau, Touraine, Loire Valley.

**GERMANY**
- Schloss Marihn, Mecklenburg-Vorpommern.

**SWEDEN**
- Sofiero Slott Helsingborg.

**DENMARK**
- Den Jydske Rosenpark, Aalestrup.

**JAPAN**
- Kani Park, Gifu.

**USA**
- ARS Gardens, Shreveport, LA.
- Barona Ranch Resort, San Diego, CA.
- Filoli Gardens, San Francisco, CA.
- New York Botanical Gardens, Bronx, NY.
- Portland Rose Gardens, Portland, OR.
- Tyler Rose Garden, Tyler, TX.

**NEW ZEALAND**
- Hamilton Gardens, Hamilton.
- Trevor Griffiths Rose Garden, Timaru.

---

*Other UK collections include:*
- Alnwick Garden, Northumberland.
- Borde Hill, West Sussex.
- R.H.S. Rosemoor, Devon.
- Royal Botanic Gardens, Kew, Surrey.
- Saville Gardens, Englefield, Surrey.
- Trentham Gardens, Staffordshire.
- Wollerton Old Hall, Shropshire.

*England Roses in Germany:*
- Schloss Marihn, Mecklenburg-Vorpommern.

*England Roses in Sweden:*
- Sofiero Slott Helsingborg.

*England Roses in Denmark:*
- Den Jydske Rosenpark, Aalestrup.

*England Roses in Japan:*
- Kani Park, Gifu.

*England Roses in USA:*
- ARS Gardens, Shreveport, LA.
- Barona Ranch Resort, San Diego, CA.
- Filoli Gardens, San Francisco, CA.
- New York Botanical Gardens, Bronx, NY.
- Portland Rose Gardens, Portland, OR.
- Tyler Rose Garden, Tyler, TX.

*England Roses in New Zealand:*
- Hamilton Gardens, Hamilton.
- Trevor Griffiths Rose Garden, Timaru.
**Breeding**

Successful rose breeding depends on meticulous planning and paying close attention to even the smallest details. Important characteristics include the beauty of the flower form, outstanding garden performance, health and fragrance. The selectors working with David Austin also look for an almost indefinable characteristic—grace. We believe that this special quality sets the English Roses apart from other roses. Following the initial selections, the most outstanding seedlings undergo up to eight years of field trials. Eventually just three to six new varieties will be released each year.

**Shows**

During 2011, we’ll be exhibiting at the Melbourne International Flower & Garden Show (MIFGS). This is Australia’s premier garden show and is on from March 30 to April 3 at the Royal Exhibition Buildings and Carlton Gardens in Melbourne, Victoria. We will be displaying our roses in the Great Hall along with Rose Introducers of Australia. Please call in to see us if you can, you’ll be delighted with the mass of colour and perfume. www.melbflowershow.com.au

**Australian Rose Societies**

The National Rose Society of Australia can provide gardeners with information on all the State Rose Societies. Visit www.rose.org.au for more information.

**Website**

David Austin’s website is one of the world’s leading online resources of information about roses. Visit the site for:

- A comprehensive description of each individual English Rose variety
- Hundreds of colour photographs of roses
- Advice on rose selection
- Planting and care advice

We are sorry that roses cannot be ordered online by Australian gardeners. Please contact your local nursery or garden centre for details of how to purchase David Austin’s roses. A list of approved Australian stockists can be found on page 59. We plan to extend the Australian section of our website over the next few months.

---

**Collecting pollen**

**Meticulous labelling for over 140,000 crosses**

**Pollinating the emasculated flower heads**

**The ripening hips will be harvested for their seed**

**Some of the 250,000 seedlings grown each year**

**David Austin in the trial fields at Albrighton**

**David JC Austin at the Chelsea Flower Show**
**English Cut Rose Collection**

**Darcey** (Auschariot)
Bright crimson buds gradually open out to form many petalled raspberry red rosettes. An attractive cluster of stamens is revealed in the heart of the flower. As the blooms age, the colour deepens, developing rich purple tones. Darcey has a very light fruity fragrance and a long vase life.

**Patience** (Auspastor)
A delightful buttermilk rose with ruffled petals, reminiscent of fine lace. The creamy yellow buds gradually open to reveal perfect, frilled rosettes with a classic button eye. A fresh Old Rose fragrance with elements of fruit, lilac and myrrh, developing lemony notes.

**Cymbeline** (Ausglade)
A glorious, deep pink rose, developing lilac tones over time. The large blooms have many folded petals arranged in a traditional Old Rose quartered style. There is a strong, classic English myrrh fragrance, later developing aspects of heliotrope, vanilla and fruit.

**Miranda™** (Ausimmon)
Spectacular rose-pink blooms made up of many wavy petals, perfectly arranged to form beautiful, almost flat rosettes. The outer petals have a lovely, streaked green effect. These gradually turn back and are hidden. There is a delicate, fruity fragrance.

**Juliet™** (Ausjameson)
One of best-known and most popular English Cut Roses. A sophisticated and elegant variety with soft, peachy coloured blooms. When fully open they reveal many neatly arranged petals nesting in folds within the heart of the bloom. There is a very light Tea Rose fragrance.

**Rosalind™** (Austew)
A rose of delicate beauty. Small, blush-pink buds open slowly to form beautiful, peony-like blooms, packed with petals. Each bloom has a large button eye in the style of the old garden roses. The fragrance is strong, complex and deliciously fruity.

It has taken over $8 million investment and fifteen years of intensive breeding to create David Austin’s luxury cut roses for the floral industry. They combine all the beauty and charm of his garden roses with the year-round availability of modern roses. David Austin’s cut roses are ideal for gift bouquets, arrangements for the home, weddings, events and special occasions. Roses are supplied at the open bud stage, with many petals in the centre visible. They will continue to open gradually over several days to reveal the glorious many petalled cupped or rosette forms, which distinguish these luxury garden-style roses from other cut roses. All our roses are available in a choice of 60cm, 50cm or 40cm stem length.

David Austin cut roses can be sourced from good wholesalers across Australia. If your wholesaler would like help to source our roses, please ask them to contact Grandiflora Nurseries
Tel: 03 97822777
E-mail: tara@grandiflora.com.au
David Austin Roses can be sold by most garden centres but there are a number who specialize in them – see page 59. Overseas we have specific display stands for David Austin Roses and will be introducing these to Australia too. Look out for the David Austin Roses display in the garden centre, where you will find a selection of our roses. David Austin’s custom made benching is combined with informative corflute, bed cards and header boards.
